CHAPTER II. Administration of Land

9. The Revenue Department remained in the charge of Rao Bahadur Dhau Bakshi Raghubir Singh, President State Council, Bharatpur, in the capacity of Revenue Member, throughout the year under report.

10. The official year of the State commences on the 1st November and the period covered by this report is, therefore, from 1st November 1922 to 31st October 1923.

The Bharatpur State is divided into two Revenue Circles, each under the charge of a Deputy Collector. Each of the Revenue Circles contains 5 Tehsils. There is also one Sub-Tehsil at Uchain falling in the Bharatpur Circle.

The charge of the Bharatpur Circle remained with Pandit Hari Shanker Davey, an official on lent services from the Government of India Revenue and Agriculture Department, till 2nd May 1923, when he was reverted to Government service and for the rest of the year, Dewan Durga Pershad who was appointed Deputy Collector, held charge of the Circle. The charge of Deeg Circle remained with Babu Hari Chand Deputy Collector.

General.—The year under report was the 22nd of the term of the current Land Revenue Settlement for the Bharatpur Circle and 23rd for the Deeg Circle. The land was originally assessed for a period of 20 years which term has been extended by 5 years by the order of the Durbar dated the 1st October 1919.

The total land Revenue demand for Khalsa land fixed at the last settlement amounts to Rs. 21,38,638, which is an increase of Rs. 2,28,272, over the old demand. The final demand was reached after progressive enhancements in the year 1905-1906. The assessment was moderate and the demand is realized in full in ordinary years when agricultural conditions are normal.

During the last decade, the gradual rise in the prices of food grains has given good opportunities to the Zimindars for earning handsome profits, after paying State assessments, which have been received with ease and at punctual periods.

The only real difficulty in realizing State assessments is experienced in years of draught when crops fail on account of scarcity of rain and there is acute distress amongst the husbandmen and agricultural communities.

During such unfavourable years, the State adopts a lenient attitude. Liberal concessions are allowed to Zimindars and cultivators in the shape of remissions and suspensions of land Revenue Demands. Taceavi advances are made to them on a large scale and at a cheap credit for the maintenance and upkeep of their plough, cattle etc. Large quantities of fodder are also supplied. The State thus meets the pending apprehensions of its agricultural communities when their resources are weakened on account of abnormal conditions.

Generally in such years of draught etc., the distress is much keenly felt in the Northern part of the State *i.e.* in the Deeg Circle where condition of land have much deteriorated since the last Settlement, as the supply of waters from the Ruparel to this part has been withheld by the Alwar Durbar, laying waste to a greater portion of the State which was formerly plentifully irrigated. The Bharatpur Circle has a number of Bunds and Channels for irrigation purposes and consequently the draught, if any, is not so acute.

11. *Crops* —Two main crops are annually harvested in the State, the, Khariff in October-November and the Rabi in March-April each year.

The Agricultural year of the State commences in November with the harvesting of the Khariff Crops. This crop accordingly depends upon the rainfall received during the monsoon months of July to September of the previous year. The rainfall during the period was plenty and in excess to that of the previous year and favourable prospects were entertained. Sowings on an excellent scale were undertaken. The rains being a little later and then sudden excessive out-pour in the end told adversely on the cotton and Bajra crops; in other respects the remaining crops have been good on an average.

The rainfall from 1st April 1922, till 31st March 1923, was 32.43, inches as against 21.83 inches of the previous year. This amount is far above the average which is 24.0. The rainfall was general and universally beneficent for agricultural operations. The months of July, August September (of the previous year) in which plenty of rains are needed for the two following crops were of excessive rains.

The rainfall from April 1922, till October 1922 (*i.e.* for the rest of the Financial year) does not contribute much to the crops of 1979. As the rains of this period influence the sowings of the Rabi crops of the Sambat year 1980, the present report has little to do with the rainfall occurring in these months.

The rainfall for the crops of 1978, Sambat year being thus plenty and universal there was a considerable increase in area under heads Barani and Sairabi while there was a decrease under head Chahi.

The year was a prosperous one.

The following statement will show the total cultivated and cropped area in Bighas under the Khariff Crops during the year under report as compared with the area of the 4 preceding years:—

Sambat.	Cultivated.	Successful.
1975 ...	9,16,060	82,017
1976 ..	11,69,068	9,50,893
1977 ...	10,56,432	6,26,648
1978 ..	11,31,703	10,49,748
1979 ...	11,91,997	11,20,347

From the above it appears that the Khariff crops of Sambat year 1979 were cultivated on a large scale to those of the previous year and the successful area also much exceeds that of the Sambat year 1978 proportionately.

The following statement will show the total cultivated and successful area in Bighas under the Rabi crops during the year under report as compared with the area of the four preceding years:—

Sambat.	Cultivated.	Successful.
1975 ...	3,08,683	2,92,351
1976 ...	10,51,590	9,79,037
1977 ...	3,31,338	3,01,038
1978 ...	9,16,758	7,96,054
1979 ...	9,56,566	9,23,540

The Rabi Crops were equally prospective as in years of good rains on an average but still fell short in comparison to those of Sambat year 1976. The total cultivated area in both crops was 21,48,563, bighas as against 20,48,461 and the total successful area was 20,43,887 bighas as against 18,45,802, of the previous year.

There was an increase in area under heads Barani and Sairabi due to good rains. There was a falling off of area under head Chahi which is always the case when rains are plentiful.

The Rabi crops are of a superior kind to that of the Khariff crop, the former consisting of wheat, gram barley and Zira, while the latter consisting of Jwar, Bajra and cotton grown on Barani lands.

Consequently the Khariff crops depend directly on rains while the Rabi depend partly on rainfall and partly on artificial sources of water supply.

Produce.—The following comparative statement will show the successful area in bighas under the various commodities during the year under report as compared with the figures of the previous four years.

KHARIF.

Sambat.	Cotton.	Grain.	Others.	Total.
1975 ...	16,940	39,926	25,151	82,017
1976 ...	70,489	7,72,526	1,07,878	9,50,893
1977 ...	55,913	3,08,096	2,62,639	6,26,648
1978 ...	47,367	8,37,577	1,64,804	10,49,748
1979 ...	40,512	8,66,570	2,13,265	11,20,347

RABI.

Sambat.	Wheat.	Other Grains.	Miscellaneous.	Total.
1975 ...	63,127	1,84,636	44,591	2,92,354
1976 ...	1,06,710	7,87,285	94,174	9,88,169
1977 ...	66,863	1,79,461	54,714	3,01,038
1978 ...	90,781	6,13,457	91,816	7,96,054
1979 ...	93,943	7,39,155	1,10,442	9,23,540

The total produce of both the Khariff and Rabi crops exceeds much to that of the previous year. Cotton in the Khariff Crop and wheat in the Rabi constitute most valuable assests with the Zimindars. During the year under report cotton crops suffered considerably on account of delayed rains in the beginning and excessive rainfall in the end. The out-turn of wheat was much satisfactory as compared with the previous year.

12. **Collections**—The following subjoined table will show the Revenue Demand and Collections made during the year under report,

Demand.		Revenue.	Cess.	Arrears.	Total.
Demand.	{ Bharatpur. Dig.	11,31,059	1,12,937	11,826	12,55,822
		10,17,524	1,10,602	2,53,441	13,81,567
	Total.	21,48,583	2,23,539	2,65,267	26,37,389
Collections	{ Bharatpur. Dig.	11,13,736	1,12,476	30,230	12,56,442
		9,92,703	1,10,363	1,41,589	12,44,655
	Total.	21,06,439	2,22,839	1,71,819	25,01,097

Thus out of a total demand of Rs. 26,37,389 a sum of Rs. 25,01,097 was realized. The balance amounting to Rs. 1,36,292 was held suspended as arrears. The Cess demand amounting to Rs. 2,23,539, was nearly realized to the full, while out of an arrear demand of Rs. 2,65,267, an amount of Rs. 1,71,819, was realized, the rest being held in suspension. On account of favourable conditions the demands were easily recovered and no coercive measures were adopted.

The agriculturists, as usual, were financed with Taccavi advances and agricultural loans from the Bank.

13. Rainfall Statistics.—The condition of the two crops Khariff and Rabi described above, which were harvested during the year under report, was determined by the Rainfall received from April 1922 till March 1923. The sowings and condition of the 2 following crops for the Sambat year 1980, were dependent on the monsoons of the year 1923.

The rainfall received from April 1922 till end of March 1923, was 32.43" as against 21.83" of the previous year. This is far above the average rainfall, which is 24" annually for the State.

The chief falls were in the following months (1923):—

July 1923	10.38".
August 1923	10.52".
September 1923	3.57".

The winter months were deficient for want of sufficient rains (in December 1922, January and February 1923).

The effects produced by the above rainfall have already been noted in describing the cultivated and successful area for different crops above.

The rainfall for November 1922 till 31st October 1923, was 27.48 inches against 30.72 inches of the previous year and against a normal of 24" at an average. The rainfall being above the normal will tend to make the crops of 1980 prospective—a mention of which will find place in the next report.

14. Relief Measures.—The year under report being a good year at an average no relief measures were necessary. However, the usual Taccavi loans were advanced for various agricultural purposes and remis-

sions of revenue were allowed where necessary. The prices were also easy and the supplies of food grains were plenty.

15. **Taccavi.**—The amount advanced as Taccavi during the year under report was Rs. 82,975 as against 1,31,177 of the previous year. It was distributed between both the Revenue Circles i. e. Rs. 41,212, to the Bharatpur Circle and Rs. 41,763, to the Deeg Circle for the following agricultural purposes:—

(1) For the repairs to old wells	... 7,385
(2) For construction of New Pacca wells	... 14,305
(3) For Sinking Kachcha wells	... 245
(4) For purchase of seed and agricultural implements	... 12,285
(5) For purchase of plough bullocks	... 41,329
(6) For fire relief	... 706
(7) Mares for breeding	... 200
(8) Repairs to Bunds	... 6,520

Total 82,975

This amount also includes the money so graciously advanced by Her Highness Shri Mati Maji Sahiba, C. I.

Interest at the rate of $4\frac{1}{2}$ per cent per annum is charged yearly on all forms of Taccavi. The timely help given by the Durbar to the agricultural community for the various purposes is highly appreciated and is conducive of considerable advantage to them.

16. **Cattle.**—The total number of cattle including sheep, goats, ponies etc. was 6,45,663, against 6,39,523, of the previous year showing an increase of 6,140, cattle.

There is a remarkable increase amongst all the heads due to good supply of fodder and the prohibition on the export of milch and agricultural stock. The decrease in sheep etc. is of small significance.

The following is a comparative statement of cattle for the 2 sambat years 1978 and 1979:—

	Sambat 1878	Sambat 1979
Bulls	706	748
Bullocks	86,607	93,103
Cows	1,32,557	1,33,474
Buffaloes	17,079	17,385
She-Bufferaloes	62,416	69,029
Calves	1,53,674	1,50,735
Ponies	6,521	6,257
Asses and Mules	14,232	13,381
Sheep and mules <i>Goats</i>	1,65,731	1,61,551
Total	6,39,523,	6,45,663

The general condition of cattle was satisfactory. Fodder and water were available in sufficient quantities and no cattle disease of a serious nature was reported.

17. *Rates and Wages.*—Rates of food grains were artificially controlled and made easy throughout the year under report. The rates of the staple Bejhar varied from 14 seers 10 Chhataks to 10 seers 2 Chhataks per rupee and that of wheat from 7 seers 12 Chhataks to 10 seers a rupee. Labour was easily procurable and wages were ordinary *i.e.* 6 annas per day for an adult male, 5 annas for a female and 3 annas for a boy. The wages, however, tend to rise or fall with the agricultural conditions; when there is plenty of work on fields on account of good harvests wages generally rise.

The number of ploughs was 52,728, against 51,196, of the previous year, showing an increase of 1,532 ploughs. The increase is due to favourable agricultural conditions. The number of cattle carts was 5,656 against 5,303 of the previous year showing an increase of 353 carts due to prosperous year.

18. *Absconders.*—The number of Zamindars who absconded was 87 against 145 of the preceding year. They owned 1,660 bighas of land assessed at Rs. 1,063, against 3,999 bighas assessed at Rs. 2,940 of the previous year. The number of those who returned was 91 owning 3,347 bighas assessed at Rs. 2,826, as against 148 owning 2,798 bighas assessed at Rs. 2,100, of the preceding year. A decrease in the number of absconders is due to good harvests etc.

19. *Irrigation.*—The total area irrigated from Bunds and channels during the year under report was 3,07,827, against 3,13,499, bighas of the previous year. Of the irrigated area water rate for 2,12,477 bighas was included in the land Revenue assessment and was recovered along with it as part of the land Revenue. Water rate was, therefore, realized on 95,350, bighas amounting to Rs. 86,268, only against Rs. 86,983-5-9 of the previous year.

In addition to the above 1719 bighas were irrigated by the waters of the Canals of the British Districts of Muttra and Agra *i.e.* from the waters of the Jamna Canal and the Fatehpur Sikri Canal passing through the territories of the State. An amount of Rs. 1,724-2-0, for 1,593 bighas realized as water rate was remitted to the United Provinces irrigation authorities to whom the Durbar's thanks are due for the help given by them to the Zamindars of the State.

The total area irrigated by the Ruparel was 25,361, bighas out of which water rate on 24,598, was included in the land Revenue assessment and an amount of Rs. 561-7-9, only was realized as water rate on 763 bighas only, as against 275 of the previous year.

The following Statement will show the total area irrigated by the Ruparel during the last 9 years.

Sambat year.	Area Irrigated.
1970	... 2,630 Acres.
1971	... 18,008 „
1972	... 4,033 „
1973	... 3,363 „
1974	... 7,018 „
1975	... 7,259 „
1976	... 17,991 „
1977	... 8,966 „
1978	... 6,840 „
1979	... 10,144 „ or 25,361 Bighas.

The rate at which the abiana is recovered is different for different kinds of the soil and varies from Rs. 2-8-0 to Rs. 0-4-0 per bigha.

20. *Natural and other Calamities.*—There was no serious disease excepting a type of malarial fever during the year under report.

The losses by fire were 217 as against 184 of the previous year. The following comparative statement will indicate the losses by fire:—

Sambat.	Number of fires.	Number of villages affected.	Value of property.
Sambat 1975 ...	223	162	80,049
Sambat 1976 ...	165	168	1,28,644
Sambat 1977 ...	301	215	2,00,985
Sambat 1978 ...	184	157	1,44,580
Sambat 1979 ...	217	167	1,14,394

There is an increase in the number of fires when compared with last year's figures which are due to natural calamities.

The officials have, however, fullest directions to control these calamities and do their utmost best in eliminating the distress. It is further satisfactory to note that the villagers always work in a spirit of mutual co-operation when they are threatened by a common danger which they try to overcome by common and joint efforts.

21. *Waste Land.*—The fallow land brought under cultivation during the year under report was 1,06,959 bighas as against 4,92,745 of the previous year. Out of the above 16,315 bighas were from the old waste. As a considerable amount of old waste was already brought under cultivation in Sambat year 1978, the decrease during the year under report is of less significance.

Endeavours however continue to be made to break up cultivable waste and as irrigation by canals increases, large tracts of waste land will be brought under the plough and made productive.

22. *Survey and Settlement Operations.*—The term of the last Revenue Settlement drawing to a termination, steps are taken to start preliminary Settlement operations in the 4 Tehsils of the State, viz, Nadbai and Weir in Bharatpur Circle and Kumer and Kaman in the Dig Circle. Steps were taken to start Patwaris' Training Classes at Bharatpur and Dig with a view to give practical training to Patwaris and new candidates for the proper and efficient carrying out of various complex duties which are likely to be involved in the Settlement work, in the following year.

23. *Railways*—The Bharatpur State is traversed East-West by the Rajputana Malwa Railway and North-East and South-West by the Bombay Baroda and Central India Railway and its Agra Branch. The former divides the State into almost 2 equal parts.

There are two Railway Junctions in the State at Bharatpur and Bayana.

24. *Shri Krishna Bank.*—Shri Krishna Bank continued to work well during the year under report. Advances were chiefly made for productive purposes and collections also remained satisfactory.

Organisation of new societies was put off while consolidation of old work was carefully attended to.

The question of liquidation of old Sahukari debts was under consideration for some time past. By way of experiment, the Diwani cases which were put before Local Committees who fully represent the borrowers and the lenders for decision under supervision of an official of the Bank.

Result of such committees proved useful and the procedure has been made permanent for future. Appointment of a separate officer has been sanctioned to preside over the meetings of such Local committees.

At the close of the year Lt. Col. Ghamandi Singh Sahib, Member of State Council and Foreign and Political Secretary, took over charge of the Bank as Manager and Pandit Bhagwat Prasad Pathak continued to be his Assistant.

25. *Army Head Quarters.*—*Inspector General.* Colonel Dhau Bakhshi Girdhar Singh continued to be the Inspector General, Bharatpur State Forces, throughout the year.

Adjutant General's Branch.—Major Balbir Singh, I. O. M., continued to be the Adjutant General, Bharatpur State Forces, throughout the year.

Quarter Master General's Branch.—Captain Jabbar Ali continued to be the Quarter Master General upto the 5th December 1922, on which date Jemadar Clerk B. Tikaram was put in charge of the General Stores in addition to his own duties. The latter was relieved of the charge of Stores, on the 13th January 1923, by Lt. Col. Bakhshi Jugal Singh, who continued to hold charge for the remaining part of the year. Lt. Madad Ali continued to work as Assistant Quarter Master General throughout the year.

During the year under report a good deal of clothing and other Stores was received from the 2nd Infantry on its amalgamation into the 1st Muttoo Infantry. Steps were taken to dispose of the unserviceable articles by public auction. The serviceable articles were supplied on requisition to the various Units of the State.

Director of Grass Farms.—Captain Tekchand Bahadur, I. D. S. M., was put in-charge of the Bagar Department in the beginning of the year under report and continued to hold charge till the end of the year.

26. First Muttoo Infantry.—Lt Colonel Sardar Bahadur Ganeshi Lal, I. O. M. continued to hold command of the Unit throughout the year.

Strength.—On the 1st November 1922 the strength of the Regiment was 723.
